Replace costly medical film printing by
printing your medical images directly
on paper with the CamHealth
Advanced DICOM Paper Printing
Solution

CamHealth Advanced DICOM Paper Printing Solution

EXCLUSIVELY DISTRIBUTED BY

CamHealth Advanced DICOM Paper Printing Solution

CamHealth's National Support Network allows us to provide you with a complete printing solutions....from single and multi practice to whole hospital solutions. Our DICOM paper printing solution provides a seamless print environment from modality to printer to produce near diagnostic paper prints of Diagnostic Medical Images by utilising revolutionary paper print technology.

Outstanding Image Quality

While Radiology providers today utilise a fully digital diagnostic workflow, where Radiologists perform their diagnosis using high quality digital PACS workstations, there is still the need to provide hard copies of patient studies to the referrer and patient.

Thanks to the latest print solution, images are sent to the printer directly from the modality's console, with print speeds up to 30 times faster than conventional film printers. Image quality has now exceeded market expectations for paper printing, with DICOM paper printing fast becoming a high quality replacement for expensive film printing.

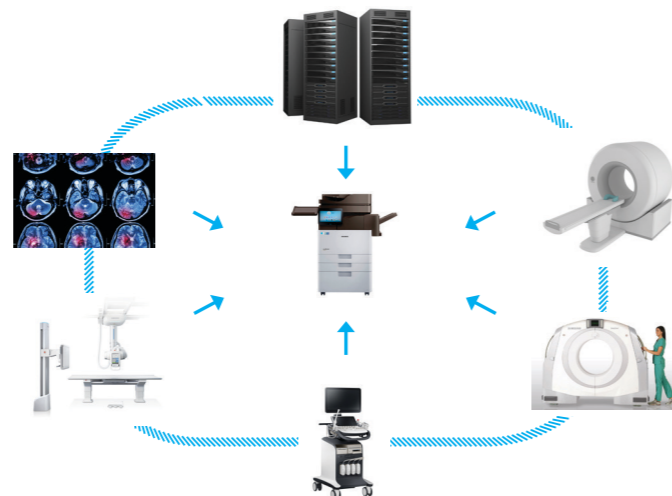

Substantial Cost Savings

Our managed print solution provides a detailed and transparent reporting process which clearly highlights cost savings compared to film printing on a monthly basis. No hidden costs.

Meeting your patients and referrers immediate needs

Paper hard copies of medical images are the most immediate and effective communication means for the patient and the referring physician. They are easy to annotate, fold and mail, as well as securely destroy.

CamHealth Advanced DICOM Printing Solution

CamHealth have partnered to bring to market the Advanced DICOM Print Solution. Our Managed Print Service (MPS) model provides you with piece of mind uptime coverage and a fully comprehensive solution which includes printers, automated consumables ordering and industry best onsite servicing.

Key Features

- Specialised hardware/software package providing a seamless process from modality to print
- Customised logo on prints (optional)
- DICOM 3.0 compatible
- Unlimited modality connections to printer
- Multiple printer connectivity across your network, allowing for redundancy
- Clinical and technical support to optimise print quality of images to ensure that they replicate film and digital image standards to meet radiologist, staff and referrer needs.
- Android based printers for customised Applications
- National service and support coverage
- Online usage monitoring across your fleet and automatic consumable ordering
- Transparent and uncomplicated billing process. No hidden costs
- Full range of consumables available, including toners and paper.

Key Benefits

- Reduce film costs dramatically
- Near diagnostic paper prints of medical images
- Simple communication means for patients and referrers
- Easy to annotate, fold and destroy
- Reduced environmental impact
- Printer color correction capabilities
- Remote maintenance and support

Reliability and Support

- National support network
- Robust, reliable and professionally supported printers
- Guaranteed response times
- Multi function devices come with 5 year guarantee.

Office Printing

CamHealth have access to a full range of class leading printers - from office administration to all areas of your business.
